DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Chu et al., USP 6,045,733.

The cited reference teaches the claimed method including making an outsole 40 by preparing a first part 30 and placing the first part within a mold 50 and injecting foamable material into the mold to cross-link and foam and become bonded with the first part. Both the injected resin and the first part of made of EVA material, wherein the first part has a first density and the injected resin has a second density, both densities being different. See col. 1, lines 35-40; col. 2, lines 10-40. Both parts may be the same color, see col. 2, lines 34-38.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/772,506

Art Unit: 1732

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chu et al., USP 6,045,733 in view of Bisconti, USP 5,814,254.

The cited primary reference substantially teaches the basic claimed method including making an outsole 40 by preparing a first part 30 and placing the first part within a mold 50 and injecting foamable material into the mold to cross-link and foam and become bonded with the first part. Both the injected resin and the first part of made of EVA material, wherein the first part has a first density and the injected resin has a second density, both densities being different. See col. 1, lines 35-40; col. 2, lines 10-40. Both parts may be the same color, see col. 2, lines 34-38.

The cited primary reference does not teach the claimed temperature range, or the first part being a flat sheet, or a tread surface as claimed.

The added secondary reference teaches as conventional an injection molding method for making EVA soles, wherein a flat blank is provided within the mold cavity, EVA is introduced into the mold cavity and a sole with a tread surface is formed. The method is more cost effective and results in the molding of a shoe sole in one molding

Art Unit: 1732

stage with a treaded surface of desired design. See col. 2, lines 55-68; col. 3, lines 25-35.

Page 4

It would have been obvious to one of ordinary skill in the art at the time the invention was made to include flat blank sheets as the first part, with tread surfaces, as shown in the added reference, when performing the process set forth in the primary reference, for making a treaded sole in one molding stage.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. USP's 5141578; 5308420; 5318645; 4897936; 5868981.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Angela Ortiz whose telephone number is 571-272-1206. The examiner can normally be reached on Monday-Thursday 9:00-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Colaianni can be reached on 571-272-1196. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
